Why would you use anything less
2500 SIS
(SIL-3)

Safety and Control in the same system

- **Costs Less**
  - Hardware: TMR <$20,000
  - Software: One-time registration fee
  - No annual maintenance fees
  - No HW/SW keys
  - Unlimited number of tags
  - Unlimited use of each application

- **Runs Faster**
  - 25 msec screw to screw
  - Up to 32 Chassis per Target Node
  - Redundant Archiving of 100K tags/sec
  - 1 msec Digital SOE, 2 msec Analog SOE
  - 10 msec HMI update rate

- **Never Stops**
  - MTBF: 2,506 years
  - MTTFS: 3,325 years
  - MTTFD: 1,245 years
  - SIL-3 PFDavg: 4.56X10⁻⁵

These are RTP's numbers and functionality, how do they compare to your present systems?
